Enterprise Performance Management

ROI.

Bolster your corporate gains by improving your ability to measure.

77%

of planning processes depend to some degree on "having access to accurate and timely data from other parts of the organization" ¹

25%

of enterprises can report financial planning and performance management metrics by business units in real time ²

75%

of enterprises are seeking ways to improve accuracy and strategic impact of financial planning and analysis data ³

If You Answer “Yes” to Any of These Questions:

Q: Do you need to tighten the alignment between business strategy and the KPIs used to set goals as well as benchmarks?

Q: Do you need to understand the choices when faced with trade-offs and competing investments?

Q: Do you need more predictive analytics that will enable you to better understand products and customers?

Q: Do you need to optimize your technology to capture more in-depth financial insights?

Q: Do you need to improve the user experience for consumers of financial data?

**Then our expertise is what you need.
Together, we'll reach a better best.**

Far too many companies have not been able to find the perfect harmony of an optimized Enterprise Performance Management (EPM) framework balanced with a scalable technology solution. An effective EPM framework steers the business and provides a heartbeat for decision-making. This balance includes the careful integration of the planning, measuring, and execution operating phases that are enabled by technology, good governance, and a defined and disciplined decision-making process.

Collective Insights helps you leverage your Business Intelligence investments to drive and simplify the identification of performance gaps, capitalize on the power of data-driven decision making, and move towards more efficient and cost-effective ways to do business.

Collective Insights helps our clients envision their digital future and architect for success through:

Integrated planning that evaluates and adjusts processes, systems, and governance from strategy to plan

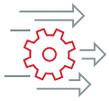

Management information that designs and delivers reporting and analytics to monitor the business performance

Performance recognition that defines and analyzes important metrics to align to individual performance plans
