Supply Chain Transformation

Digitizing the modern supply chain for transparency, adaptability, and resiliency.

25%

is the average gain in productivity when organizations upgrade their pick/inventory systems from paper-and-pencil to a more integrated order processing ¹

80%

of companies expect to be disrupted by a digitally-enabled competitor within the next five years ²

79%

of companies with high-performing supply chains achieve revenue growth superior to the average within their industries ³

If You Answer “Yes” to Any of These Questions:

Q: Does your supply chain need to be redesigned to remain competitive and secure against business and economic dynamics?

Q: Does your supply chain need a better connection to the enterprise for faster decision making?

Q: Do you need the flexibility of a multi-level supply chain with the control and visibility of a vertically integrated supply chain?

Q: Do your supply chain signals and data fail to accurately capture your customer preferences and experiences?

Q: Do operational challenges across your supply chain impact your working capital and ability to forecast cash flow?

Q: Do your supply chain processes need to be standardized, simplified, and automated to be as efficient and nimble as possible?

**Then our expertise is what you need.
Together, we'll reach a better best.**

Supply chains must be agile and nimble in order to be successful in Industry 4.0.

Our experts help supply chain leaders develop a strategy to win in the digital economy, transform processes for scale and automation, digitize the end-to-end supply chain, and turn the supply chain into a competitive advantage.

Our Collective Insights team of skilled professionals are not only trusted advisors but also experts in delivering supply chain transformation by:

Identifying industry disruptors that will have a material impact on your organization's competitiveness

Developing a supply chain strategy that supports business objectives

Reducing risk to your business through network continuity and traceability

Reducing waste and inefficiency through process redesign

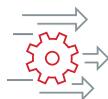

Establishing change management and communications to reduce implementation risk and drive impact

Implementing new digital capabilities that allow for increased collaboration and visibility
